Intellectual Property Commercial Services

Nuclear Knowledge
It's in our heritage.

PROUD OF OUR
BRITISH
HERITAGE

WORKING WITH INS MEANS YOU'RE GETTING MORE THAN JUST A SPECIALIST TRANSPORTER OF NUCLEAR MATERIALS, YOU'RE GETTING A GATEKEEPER TO UNIQUE NUCLEAR KNOW-HOW, UNSURPASSED TRANSPORT HERITAGE AND EXPERTISE, AND RESPECTED PARTNERSHIPS THAT INSPIRE CONFIDENCE.

60 YEARS
of successes

60 YEARS
of fuel cycle and
decommissioning challenges

60 YEARS
of lessons learned

- INS is a wholly-owned subsidiary of the Nuclear Decommissioning Authority (NDA) and has extensive and proven expertise in irradiated fuel management and nuclear material transportation
- We design complete end-to-end transport solutions and trade in nuclear experience and expertise solving complex and often controversial challenges
- INS can help unlock your nuclear challenges by providing access to intellectual property and operational knowledge from the NDA's 17 UK nuclear sites

Intellectual Property: unlocking your nuclear challenges

Unlocking decades of British-born technology

The UK Nuclear Decommissioning Authority (NDA) has responsibility for 17 nuclear sites in the UK, some dating back to the 1940s, including Sellafield, Dounreay and the Magnox reactor sites.

As well as being responsible for decommissioning and clean-up of these facilities, the NDA owns all of the associated intellectual property developed across all of those sites. That's 60 years of fuel cycle and decommissioning challenges, 60 years of successes and 60 years of lessons learned.

Intellectual property exists in a variety of forms across the NDA estate.

At each of the sites there is a collected wealth of research and development, know how, test results, practical experience and documented evidence which can be tapped into and exploited to meet new nuclear challenges.

INS is the commercial arm of the NDA and provides commercial services related to the exploitation of this intellectual property. We are in the unique position of being able to provide access to the operators at these sites and provide insight to the knowledge and experience gained in some of the most challenging nuclear environments.

Commercial Services: decades of commercial expertise

Connecting the global nuclear market

We can help unlock some of your own nuclear development, fuel cycle, waste management and decommissioning challenges by sharing the decades of commercial expertise we have built up in the UK civil nuclear industry.

We offer customers a wide range of consultancy services, strategic assessments and feasibility studies relating to irradiated fuel management, transportation and packaging, and we support utility customers and government agencies with advice on the strategic and technical options relating to the back end of the fuel cycle.

On behalf of the NDA, INS works closely with the UK's Department for International Trade (formerly UKTI) to connect UK expertise with real opportunities in markets around the world. As an example, we are linking companies to opportunities in the Japanese decommissioning and fuel cycle market, where we have been operating and building unique relationships for 40 years.

Domestically we work closely with partners including Direct Rail Services Ltd (DRS), Sellafield Limited and Radioactive Waste Management (RWM) on both a consultative and commercial basis.
